

Lubrication for Flameproof Enclosures

Renocal FN is a low temperature multipurpose lubricating grease on a anhydrous calcium soap base w/ corrosion and oxidation inhibitors.

Renocal FN protects reliably from corrosion and shows good water resistance, even at higher temperatures. Furthermore it is easily pumpable in central lubricating systems, also at low temperatures. It is compatible w/ paint. Renocal FN causes no discoloration during assembly work if it comes into contact w/ painted chassis parts.

Advantages

- Huge temperature range
- Good corrosion protection
- Easily pumpable in central lubricating systems
- Paint compatible
- Good water resistance
